

## **BASC Announces New Vending Partner**

June 2008

***From:***

*Brockport Auxiliary Service Corporation  
The College at Brockport  
350 New Campus Drive  
Brockport, New York 14420*

Brockport Auxiliary Service Corporation (BASC) is pleased to announce that Loose Ends Vending Inc. has been awarded the vending contract for The College at Brockport. This new contract brings some exciting benefits including all new energy star rated machines, great product selection, new MetroCenter machines that accept Easy Money and offer the latest in cold food merchandising, and \$5,000 in scholarships for BASC student employees.

It is anticipated that these new energy star refrigerated beverage machines will save the campus 1,700 kilowatts of electricity per year when compared to the existing machines. BASC looks forward to working with Loose Ends Vending Inc. on additional energy savings opportunities in the future as part of the corporation's commitment to being a good campus environmental steward.

Loose Ends Vending Inc. offers an extensive product mix, including many healthy selections with their Balanced Choices program. They are dedicated to selling the products customers want, utilizing key processes to ensure that machines are being stocked according to the demands in each location. In addition, all snack machines are equipped with "SureVend" to ensure delivery of product and virtually eliminate the need for refund requests.

The new vending machines will be equipped to accept Easy Money as in the past. Easy Money is a convenient, cashless way to make vending purchases. To sign up for Easy Money and to manage your account online, visit [www.basc1.com/Easy\\_Money](http://www.basc1.com/Easy_Money).

The transition between the incumbent provider, AVI Vending, and Loose Ends Vending Inc. will take place between July 7 and August 15. During this time, machines will be swapped out by location. Residence halls will be completed first and then academic halls. The number and location of machines will remain the same. Each building coordinator will be notified of the schedule for their building. It is anticipated that each location may be without vending for approximately 1 – 2 days as the old machines are removed, areas are prepared for the new machines, and the new machines are installed. Please contact the building coordinator for specific building scheduling information.

Loose Ends Vending Inc. services over 1,700 clients in the New York and Pennsylvania areas, including eleven colleges like St. John Fisher, Nazareth and Geneseo. Their headquarters are located in Batavia, New York and they have a satellite location in Rochester, in addition to three other satellite locations.

For more information on BASC's vending program, including information on how to report a service problem, visit [www.basc1.com/Other\\_Services/vending.htm](http://www.basc1.com/Other_Services/vending.htm).
